

Peach, the fruit of youth

The peach, fruit originated in China, is known around the world since twenty centuries before Christ. It is grown in regions of low temperatures and harvest in South America occurs between November and January each year.

With high nutritional value, it contains large amounts of vitamins A, B, C, D, minerals and fiber, benefiting the intestine, avoiding problems in skin, digestive system, nervous system and reducing cholesterol.

The fresh fruit has few calories, only 35 kcal/units, therefore, it is recommended for those who want to lose or maintain weight.

Mango Palmer season

Please keep in mind that the crop is scheduled to be finished by the end of March/09; it is time to schedule your volumes and close your contracts.

Come check the best conditions that we are in position to offer you.

It is acerola's time!

Acerola crop is expected to extend until March/09. We have NFC juice for prompt shipment and concentrate, from March/09 on, but it is necessary to know the client's needs now to guarantee fresh fruit's availability. Please let us know!

Sugar
